I am emailing concerning Eight Mile Creek Road. My name is Lisa and I am 18 years old. My father and I live off of Eight Mile Creek Road and are very concerned with the condition of the road. It is not only a hassle to drive on but a huge risk. There are many young children who walk along and stand beside the road waiting for their school bus. While they wait, the people driving swerve to miss the potholes to avoid possible damage to their vehicles. This road has caused a huge hazzard to both the drivers and the children who walk to road. The last thing I want to hear is about a young child getting hurt or possibly killed from a driver who tried to miss the trenches in the road. Coming from a drivers standpoint, if I hit a pothole in my car, it will easily be wrecked. I have a small honda that is very low to the ground and made out of fiberglass parts. If I take one of those potholes with my car, it will easily rip my car apart. I think I am one of many concerned citizens not only because I really would rather not have to be out of a car so it can be fixed, but also for the other people and children of this community. Eight Mile Creek Road is a danger to our community and needs to be fix immediatly, before somebody gets hurt. Please, for the safety of our family, friends, and children, consider repaving Eight Mile Creek Road.

Thank You
